

## Weekly Update 1.9.2020

In just a couple of weeks, amazing progress has been made on our building project, especially on the clergy/classroom addition! The steel has arrived, and the workers have been working hard to place and weld it. In this first picture, this is the view of the addition as if you were looking from the Social Hall.

In this next picture, this is the view of the addition as if you are standing behind the building, looking toward the Social Hall. Note that, on the left, we can start to see the elevated walkway that will connect the addition to what is currently staff offices.

PLEASE, we do have a request: The welding involves extremely bright arc flashes, and while it is great fun to watch the progress, please do NOT look directly at this light, as it could damage your vision. Our contractors have posted signs in all the rooms that overlook the construction area, and the teachers are keeping the blinds closed in the classrooms, but we wanted to alert the congregants as well. If, however, you are at TRS when welding is not happening, then feel free to look all you want! It's super exciting to see the buildings grow every day!

As always, if you have any questions, feel free to email us at [bptf@templerodefshalom.org](mailto:bptf@templerodefshalom.org).
