

## Weekly Update 2.20.2020

Great news – the workers have begun to install the steel for the small sanctuary! In the picture below, this is a view of what will be the foyer outside of the new sanctuary.

These steel structures will hold the beams that mimic the “trees” in our current Grand Foyer. Below is a “concept rendering” of the new space from May 2016. The foyer won’t quite look like this, but the rendering gives a sense of the “trees”.

Meanwhile, in the rooms adjacent to small sanctuary, the truss joints have been installed, in preparation for the roof.

Keep your fingers crossed for dry, temperate weather, and we should see some exciting progress in the next few weeks!

As always, please reach out if you have any questions: [bptf@templerodefshalom.org](mailto:bptf@templerodefshalom.org).
